THE PILOT KNOB – BURNSVILLE REBUILD PROJECT will enable Great River Energy to maintain reliable and resilient service to electric customers in the area between Eagan and Burnsville by increasing the capacity to operate at 115-kV. The ability to operate at the higher voltage will ensure there is sufficient electrical capability to serve electric vehicle charging and other electrification initiatives.

**Additional project information and updates are available at
www.GreatRiverEnergy.com/pilotknob**

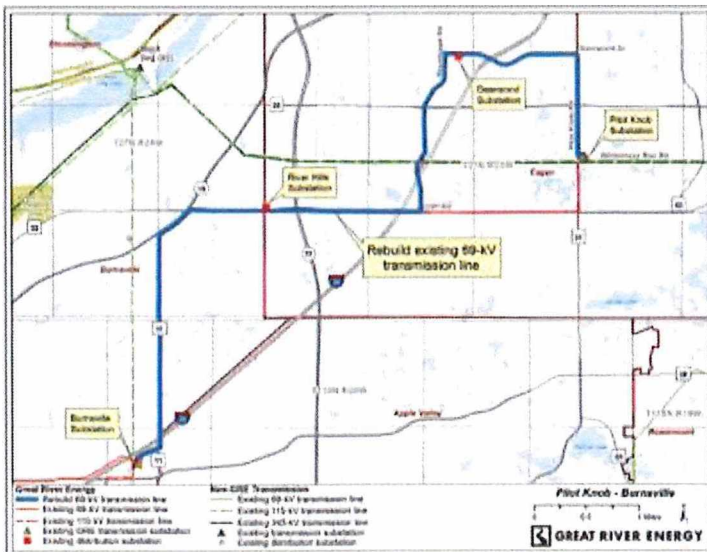

We encourage you to attend the open house to get involved and have your questions answered. If you are unable to attend one of these meetings, contact us with questions.

Book, from 11A

expecting that. Anyone who has been touched by Alzheimer's has been exceedingly touched by the book. The family who served at the impetus has been very supportive and loved the way it turned out. That meant the world to me.

How long have you lived in the area?

Living in Lakeville affords me so many fun living opportunities. We live on the north side of Lake Marion in a house we began rehabbing in 2004. I can easily be out on my pontoon boat or kayak one hour, while still being able to walk to Target or ride my bike to downtown Lakeville or the Heritage Library the next. Our neighbors are great and three of our four daughters live nearby in Eagan, Woodbury, and Eden Prairie. Our 11 grandchildren love visit-

ing and especially like riding their bikes up to Dairy Delight.

Anything else?

I never thought I would be able to fulfill my dream of writing a children's book. But I learned over time that all dreams are attainable if you are willing to do the work AND have some supportive folks in your

court. My husband and daughters were so supportive. When I was losing hope, they weren't. I hope someday I can be that support for someone else on their writing journey.
